Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE three MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Amendment

1. This action is responsive to an amendment filed 1/3/02. Claims 1-50 are pending.

Response to Arguments

2. Applicant's arguments filed 1/3/02 have been fully considered but they are not persuasive.

The Applicants argue that the image pump is separate and discrete from the image source and Safai et al. teach that the application program is integral with the digital camera. Claim 1 recites a system having an image source and an image pump that receives the image from the image source via one of a wireless or hard wired connection, etc. Thus, if the image source and the image pump are connected via a hard wired connection, it could very well be one integral unit. Safai et al. teach that the digital images are sent from the camera to a destination, which reads on the service provider. For these reasons, the rejection of claims 1-47, 49 and 50 remains. Regarding claim 48, in response to applicant's argument that Maurinus fails to identically teach reviewing the image data and customer account information for accuracy, a recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim. In a claim drawn to a process of making, the intended use must result in a manipulative difference as compared to the prior art. See *In re Casey*, 152 USPQ 235 (CCPA 1967) and *In re Otto*, 136 USPQ 458, 459 (CCPA 1963). Therefore, the rejection of claim 48 remains.

Claim Rejections - 35 USC § 102

3. Claims 1-47, 49 and 50 are rejected under 35 U.S.C. 102(e) as being anticipated by Safai et al. (US 6167469). Please refer to item 2 of the previous office action.

4. Claim 48 is rejected under 35 U.S.C. 102(e) as being anticipated by Maurinus et al. (US 6222646). Please refer to item 3 of the previous office action.

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
